PROFILE

Motivated and detail-oriented MCA graduate seeking an entry-level Java Developer (Fresher) role where I can apply my knowledge of Java, Spring, and database technologies to contribute to organizational growth while continuously enhancing my technical skills.

EDUCATION

2023 – 2025	Master in Computer Application at Odisha University of Agriculture and Technology	78.76
2020 – 2023	Bachelor of Science in Data Science Management at Ravenshaw University	86.58
2019	Class 12th (CHSE)	59.50
2017	Class 10th (CHSE)	60.50

WORK EXPERIENCE

Software developer intern, Infosys Jan 2021 - present

Software Developer Intern at Infosys, where I worked on application development by following standard software engineering practices. I gained hands-on experience in frontend technologies including Angular, Bootstrap, TypeScript, HTML, and CSS, and in backend development using Java and Spring Boot, contributing to the development of scalable and maintainable web applications.

PROJECTS

Ekart E-Commerce Web Application

- Designed a full-stack e-commerce solution using Spring Boot, Angular, and MySQL with user, product, cart, and payment capabilities
- Connected REST services with database operations to support registration, product exploration, and order handling
- Applied secure coding practices and modular architecture to deliver a responsive and scalable platform

Food Adda – Food Delivery Web Application

- Designed a multi-role food delivery system using Spring Boot, Angular, and MySQL supporting Customer, Vendor, and Admin operations
- Enabled restaurant browsing, cart management, order tracking, and menu administration through RESTful services
- Implemented role-based access and secure data handling to streamline end-to-end ordering workflows

E-Pharmacy – Online Medicine Ordering System

- Developed a full-stack e-pharmacy platform using Spring Boot, Angular, and MySQL for medicine search, purchase, and order tracking
- Integrated authentication, catalog management, cart operations, and payment processing via REST APIs

- Optimized database design and performance to ensure a secure, scalable, and responsive user experience

Cab Booking Management System

- Engineered a Spring Boot cab booking service using Java, Spring Data JPA, and MySQL to manage reservations and trip records
- Integrated validation, exception handling, and logging to enhance reliability and maintain layered architecture standards
- Verified API functionality using JUnit 5 and Mockito to ensure stable business logic and transaction handling

InfyInterns – Internship Management REST API

- Engineered a Spring Boot RESTful service using Java, JPA/Hibernate, and MySQL to manage project assignments and mentor allocation
- Integrated CRUD operations, validation, exception handling, and AOP logging to ensure reliable backend processing
- Architected a layered structure and executed JUnit and Mockito tests to maintain robust and standards-compliant code

Flight Booking Web Application

- Created a responsive flight booking interface using Angular, TypeScript, and JSON Server with real-time seat updates
- Applied reactive forms, validation rules, routing, and REST operations for efficient ticket management
- Structured a single-page architecture with dynamic updates and service-based design for scalability

WeCare – Life Coaching Application

- Developed a role-based Angular platform for user and coach registration, login, and appointment scheduling
- Implemented reusable reactive forms with validation and conditional rendering for efficient data capture
- Integrated JSON Server APIs and route guards to ensure secure navigation and modular structure

SKILLS

Tech Stack: Java, Spring Boot, Angular, MySQL, REST APIs

Frontend: HTML5, CSS3, Tailwind CSS, Responsive UI

Tools: Git, Postman, Maven, Docker

Core Strengths: Problem Solving, Team Collaboration, Time Management
